

Victor Letzelter

PhD Student in Machine Learning, Paris, France

✉ letzelter.victor@hotmail.fr | 🌐 @Victorletzelter | 🌐 victorletzelter.github.io | 📞 +33.6.42.07.42.83

EDUCATION

PhD in Machine Learning at **Telecom Paris** (Palaiseau, France) 2023 – Present

The PhD research on data uncertainty quantification with deep neural networks and has resulted in publications [1, 2, 3, 4, 5, 6] and open-sourced repositories.

MRes Mathematics, Vision, and Learning (MVA) at **ENS Paris-Saclay** 2021 – 2022

Specialized in deep learning, computational statistics and convex optimization, applied to computer vision, graphs and time series processing. GPA: 83% with highest honors.

MSc in Data Science at **Mines de Saint-Étienne** (Saint-Étienne, France) 2019 – 2022

Covered advanced topics in probabilities, statistics, machine learning, and quantum physics. Graduated with a GPA of 87%.

Bachelor in Mathematics at Université Jean-Monnet (Saint-Etienne, France) 2020 – 2021

Alongside Mines de Saint-Étienne; measure theory, differential calculus, topology. GPA: 79%.

Preparation classes at Lycée Fabert (Metz, France) 2017 – 2019

Field MPSI-MP* – Intensives courses in Maths, Physics, and Computer Science to prepare for competitive exams. Admitted at Mines de Saint-Etienne (‘Mines-Ponts’ Competitive Exams).

WORK EXPERIENCE

PhD Student at **Valeo.ai** (Paris, France) 2023 – Present

Learning with *multiple hypotheses* from ambiguous signals, *e.g.*, audio, vision, and time-series. Supervision: G. Richard, M. Fontaine, S.Essid, A. Bursuc and P.Pérez.

Research Scientist at **Valeo.ai** (Paris, France) Dec. 2022 – Mar. 2023

Research position before the start of a PhD. Supervisor: Patrick Pérez.

Research Intern at **Neural Concept** (Lausanne, Switzerland) Apr. 2022 – Sept. 2022

Neural Concept leverages Geometric Deep Learning for Physics. Research topic: Multi-task Learning on geometric neural networks. Supervisor: Jonathan Donier.

Research Intern at the **National Laboratory of Fusion** (Madrid, Spain) June 2021 – Aug. 2021

Development of a probabilistic model for data generation. Design of a Deep learning algorithm for event detection in time series of electrostatic potential.

SELECTED PUBLICATIONS

**Equal contribution. Full list on next page.*

A. Cortes*, R. Rehm, and **V. Letzelter***. “Winner-Takes-All for Multivariate Probabilistic Time Series Forecasting”. In: **ICML**. 2025.

D. Perera*, **V. Letzelter***, T. Mariotte, A. Cortés, M. Chen, S. Essid, and G. Richard. “Annealed Multiple Choice Learning: Overcoming limitations of Winner-takes-all with annealing”. In: **NeurIPS**. 2024.

V. Letzelter*, D. Perera*, C. Rommel, M. Fontaine, S. Essid, G. Richard, and P. Pérez. “Winner-takes-all learners are geometry-aware conditional density estimators”. In: **ICML**. 2024.

V. Letzelter, M. Fontaine, M. Chen, P. Pérez, S. Essid, and G. Richard. “Resilient Multiple Choice Learning: A learned scoring scheme with application to audio scene analysis”. In: **NeurIPS**. 2023.

SKILLS

French: Native language. **Tools:** Python, Git, LaTeX (proficient); Shell, Slurm, R, C and Java (basic).

English: Proficient. **Libraries:** PyTorch, NumPy, SciPy, HuggingFace, Scikit-Learn, MLFlow.

German: Beginner. **Skills:** Research methodology, theory, experimental protocols.

OTHER

Service. Reviewer: ICML24 and NeurIPS25. Teaching: Gaussian Processes and Deep Learning (IPP).

Talks. NeurIPS in Paris, UPF Barcelona, Flatiron Institute, Charles University in Prague.

Sports. Running, Trekking, Road and mountain biking, Swimming, Skiing, Table tennis.

Interests. Music (Piano, Production), Chess, Market Finance, Astrophysics.
